Bright Coffee Shop Sales Analysis

Executive analysis of sales performance across stores, products, and time

Covering **January – June 2023** · 3 store locations · 80 products · 149,000+ transactions

What's Inside

- **Summary** — Executive recap of H1 2023 performance with key findings and recommendations.
- **Detailed View** — How each value is calculated, with tables breaking every KPI down by month, hour, store, category, type, and product.
- **Executive Overview** — Headline KPIs, revenue trends by month, and performance by store and product category.
- **Sales & Time Analysis** — Revenue patterns by hour, day type, and 30-minute interval, plus a day × hour heatmap.
- **Product Performance** — Top and bottom products by revenue and units, category and type breakdowns, and a detailed product table.
- **Store Performance** — Revenue and units by location, category × store comparisons, and monthly trends per store.
- **Glossary** — Definitions of every metric, dimension, classification, and naming convention used in this dashboard.

Use the global filters (date range, store, product, and time of day) to slice every page.

At a Glance

- **Total Revenue**: $698,812 across the first half of 2023
- **Total Units Sold**: 214,470 units
- **Stores**: 3 locations — Hell's Kitchen, Astoria, and Lower Manhattan
- **Products**: 80 distinct products tracked

Top Store: Hell's Kitchen leads with $236,511 in revenue (33.84% share), with all three stores clustered within $6,500 of each other.

Trend: Revenue more than doubled from January ($81,678) to June ($166,486).

Summary

Global filters

Summary

Bright Coffee Shop delivered **$698,812** in revenue from **214,470 units sold** across its three New York locations between January and June 2023, with revenue more than doubling from January ($81,678) to June ($166,486) — a clear sign of accelerating momentum heading into Q3.

- **Stores**: All three locations are tightly clustered — Hell's Kitchen ($236,511, 33.84%), Astoria ($232,244), and Lower Manhattan ($230,057). Lower Manhattan sells the most units but earns the least revenue, pointing to a lower average transaction value.
- **Time**: The morning rush (08:00–10:00) drives peak revenue, topping out at $88,673 at 10:00, while the 18:00–20:00 evening window is the softest period.
- **Products**: Large-size premium drinks (e.g., Sustainably Grown Organic Lg, $21,152) lead on revenue, while regular-size, lower-priced options drive unit volume.

Recommendation: Prioritise morning staffing to protect the 08:00–10:00 peak, run evening promotions to lift the 18:00–20:00 window, and study Hell's Kitchen's product mix to close Lower Manhattan's revenue-per-unit gap.

How Each Value Is Calculated

All figures derive from the raw transaction table (Jan–Jun 2023), where each row is one product line in one transaction:

- **Total Revenue** = sum of (transaction quantity × unit price) across every transaction line.
- **Total Units Sold** = sum of transaction quantity across every transaction line.
- **Total Sales Records** = count of transaction IDs (individual product lines rung up).
- **Total Products / Total Stores** = count of distinct product IDs / store IDs.
- **Avg Revenue per Transaction** = Total Revenue ÷ count of transactions.
- **Avg Unit Price** = average unit price across all transaction lines.
- **Revenue Share** = group revenue ÷ total revenue over the whole period.

The tables below break each headline value down by month, hour, store, category, type, and product — so every KPI on the Summary and Executive Overview pages can be traced to its components.

Monthly Detail

Month	Total Revenue	Total Units Sold	Total Sales Records	Avg Revenue per Transaction	Revenue Share

Units Sold Over Time

Key Insights

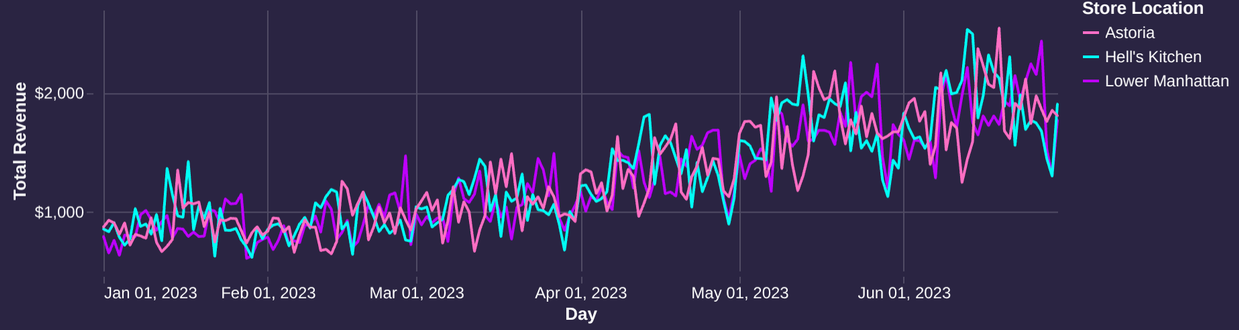

- **Revenue Growth**: Total revenue reached **$698,812.33** across January–June 2023, with strong month-over-month growth. Revenue more than doubled from January ($81,678) to June ($166,486), indicating accelerating business momentum.
- **Top Store**: Hell's Kitchen leads with **$236,511** in revenue (33.84% share), closely followed by Astoria ($232,244, 33.23%) and Lower Manhattan ($230,057, 32.92%). All three locations perform within $6,500 of each other.
- **Scale**: **214,470** total units sold across 3 stores, with **80** distinct products in the catalogue.
- **Recommendation**: The consistent upward trend suggests seasonal growth or an expanding customer base. Consider increasing inventory and staffing for Q3 to maintain momentum.

Time Analysis Insights

- **Peak Hours**: The morning rush (08:00–10:00) generates the highest revenue, peaking at **10:00 ($88,673)**. Revenue at 09:00 ($85,170) and 08:00 ($82,700) are also strong.
- **Afternoon Plateau**: Revenue drops sharply after 11:00 ($46,319) and stabilises at approximately **$40,000–$41,000 per hour** through the afternoon (12:00–17:00).
- **Slowest Periods**: The opening hour (06:00, $21,900) and closing hour (20:00, $2,936) are the slowest. The 19:00 hour also sees low revenue ($28,447).
- **By Day of Week**: Units sold are fairly evenly distributed across all days (~10,000–10,600 per store per day). Monday is the strongest for Lower Manhattan (10,748 units), while Saturday is the softest across all three stores.

Product Insights

Glossary

Global filters

Metrics & Measures

- **Total Revenue** — Sum of (transaction quantity × unit price) over all transaction lines in scope. Displayed in USD.
- **Total Units Sold** — Sum of the quantity of items sold across all transaction lines.
- **Total Sales Records** — Count of transaction IDs; each record is one product line rung up in a single transaction.
- **Total Products** — Count of distinct product IDs in the catalogue.
- **Total Stores** — Count of distinct store IDs with sales in the period.
- **Avg Revenue per Transaction** — Total Revenue ÷ count of sales records. Measures typical basket value per product line.
- **Avg Unit Price** — Average price of a single unit across all transaction lines.
- **Revenue Share** — A group's Total Revenue as a percentage of the whole period's revenue (e.g., one store's slice of total sales).

Dimensions & Classifications

- **Store Location** — One of three NYC shops: Astoria, Hell's Kitchen, Lower Manhattan.
- **Product Hierarchy** — Category (Coffee, Tea, Drinking Chocolate, Bakery, Flavours) → Type (e.g., Gourmet brewed coffee, Brewed Chai tea, Scone) → Detail (the specific product, including size).
- **Time of Day** — Morning (06:00–11:59), Afternoon (12:00–17:59), Evening (18:00–20:59).
- **Day Type** — Weekday (Mon–Fri) vs Weekend (Sat–Sun).
- **Hour / 30-Minute Interval** — Hourly buckets (e.g., "08:00") and half-hour buckets (e.g., "08:00", "08:30") used for intraday analysis.
- **Month / Month-Year** — Calendar month labels and month-start dates used for trend charts and monthly tables.

Product Size Naming

- **Rg** — Regular size · **Lg** — Large size · **Sm** — Small size. The suffix appears in product names (e.g., "Latte Rg", "Dark chocolate Lg", "Our Old Time Diner Blend Sm").

Data Source

- All pages draw from the BrightCoffee sales dataset built on the raw transaction table, covering **January–June 2023**.
